## Accusharp End Mills

Accusharp Cutting Tools Pvt. Ltd. are well established Manufacturer of a wide range of **Carbide Metal Cutting Tools**. The wide range of our metal cutting tools includes Drills, End-Mills, Reamers, Cutters, Inserts, Gun-drills, etc.

One of the niche items from our entire product range is End-Mill Cutter. Various types of End-Mill cutters are manufactured as 'standard', as well as, 'special', according to customers' application requirements.

### Types of our End-Mill Cutters:

- Straight End-Mill
- Slot End-Mill
- Profile End-Mill
- Ball-Nose End-Mill
- Serration End-Mill, etc.

**Sizes:** Size ranging from Ø 2mm to Ø 32mm

### Raw material used:

These End-mills are manufactured from Tungsten Carbide supplied by international brands. We have modern facilities, machines, and process equipment for manufacturing these products.

### Operational Features:

Our End-Mill Cutters of high productivity with operational quality performance offer customers:

- Enhanced productivity while milling nickel, stainless steel and titanium alloys
- Desired surface finish
- Extended tool changing frequency, and set up
- Performance consistency for longer tool life
- All this helps customers for:
  - » Better material removal rates,
  - » At reduced operational Cost
  - » Improved work piece component Quality

**Benefits to users: 'Cut Fast & Cut Cost'!**
